

Bahrain Imports

A Simple Study of Bahrain's Import Data (2021-2025)

PREPARED BY

Fatema Khalil Ebrahim Shamlooh

DSB 2 (Full-Time)

1. Introduction & Background

How Businesses Buy Goods in Bahrain

Bahrain is a small island with a busy shipping port. Many local businesses currently buy their goods from local middlemen (distributors).

These middlemen charge extra fees, which makes the products more expensive. This project looks at how businesses can buy directly from other countries to save money and increase profit.

2. Problem Statement & Project Goals

The Sourcing Problem

Local businesses in Bahrain spend too much money buying goods from third-party distributors. This project analyzes five years of customs import data (2021-2025) to help businesses buy directly from international partners and lower their costs.

Our Goals

Study 5 years of real import data (2021-2025). Find the top countries and make a simple plan to buy directly from them.

3. Data & Methodology

Column Name	Data Type	Status	What it Means
Year	int64 (Number)	Clean	The year of import (2021 to 2025)
Country Name	String (Text)	Clean	The country sending the goods
Import Value (BD)	float64 (Decimal)	Clean	Total cost in Bahraini Dinars
Import Weight (KG)	float64 (Decimal)	Clean	Total weight of the goods
Import Quantity	int64 (Number)	Clean	Number of items imported

**~1.6 million import records
analyzed across 5 years**

Data Cleaning :

- *Drop Arabic Columns:* We removed the columns because we already have the English columns Country Name and Commodity.
- *Remove Unused Columns:* We deleted the extra column N because it was just empty numbers from the original files and not useful for analysis.
- *Fix Missing Values:* We filled all empty spaces in the Commodity, UN code, and UM columns with the word 'Unknown'.
- *Correct Data Types:* We changed the data type of the Import Quantity column from a decimal number (float64) to a whole number (int64).
- *Remove Negative Records:* We checked for wrong numbers and deleted 1 row that had a negative import value (Import Value (BD) < 0).

4. Agenda (Roadmap)

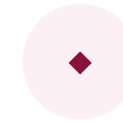

Top Trading Partners

Find the countries that send the most goods to Bahrain, by value.

Import Value Trends

See how total import value changed from 2021 to 2025.

Findings & Recommendations

Turn these patterns into a simple direct-import strategy.

5. Deep Dive: Top Trading Partners

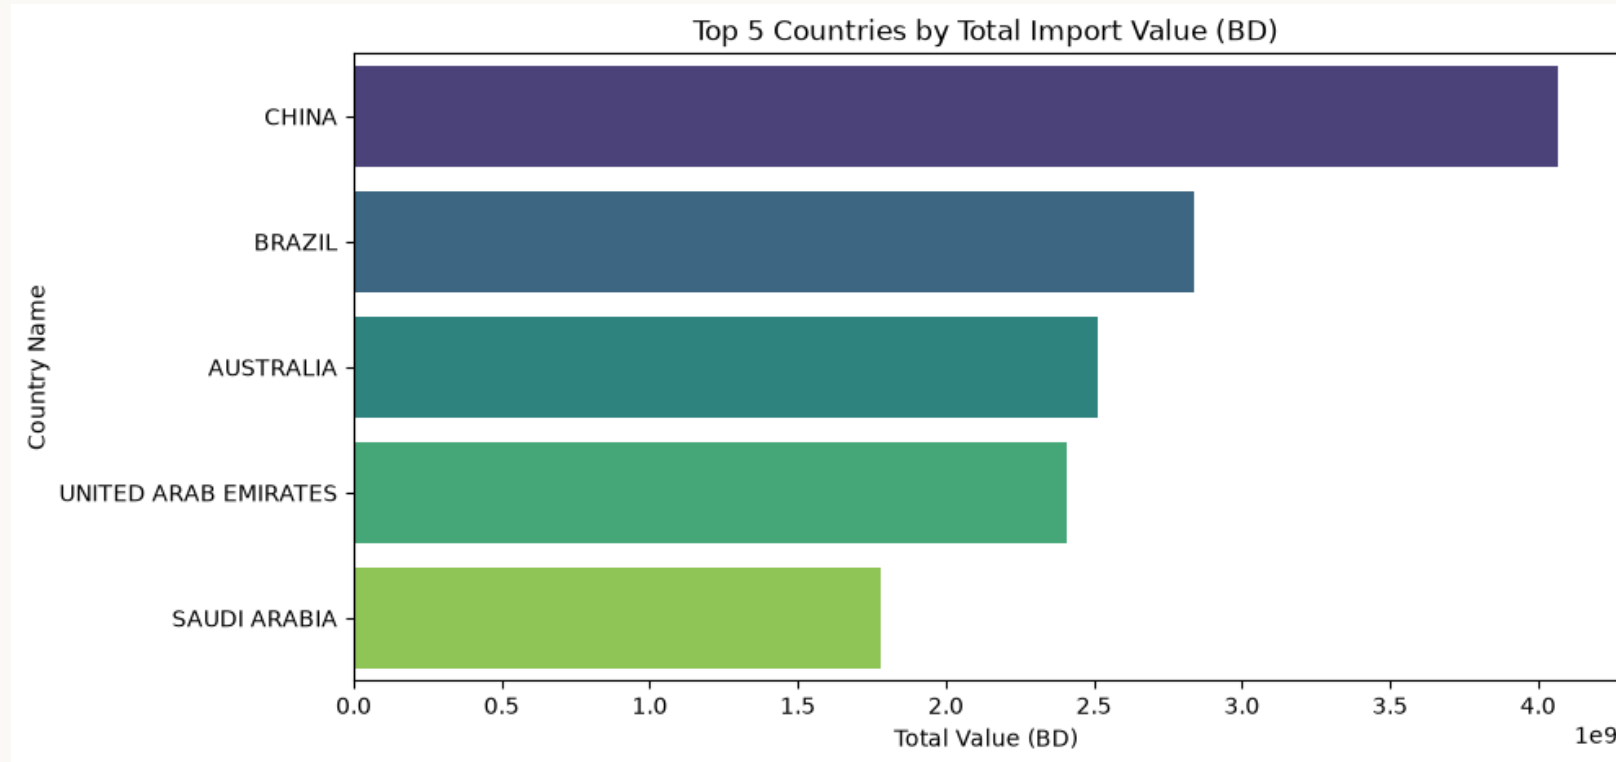

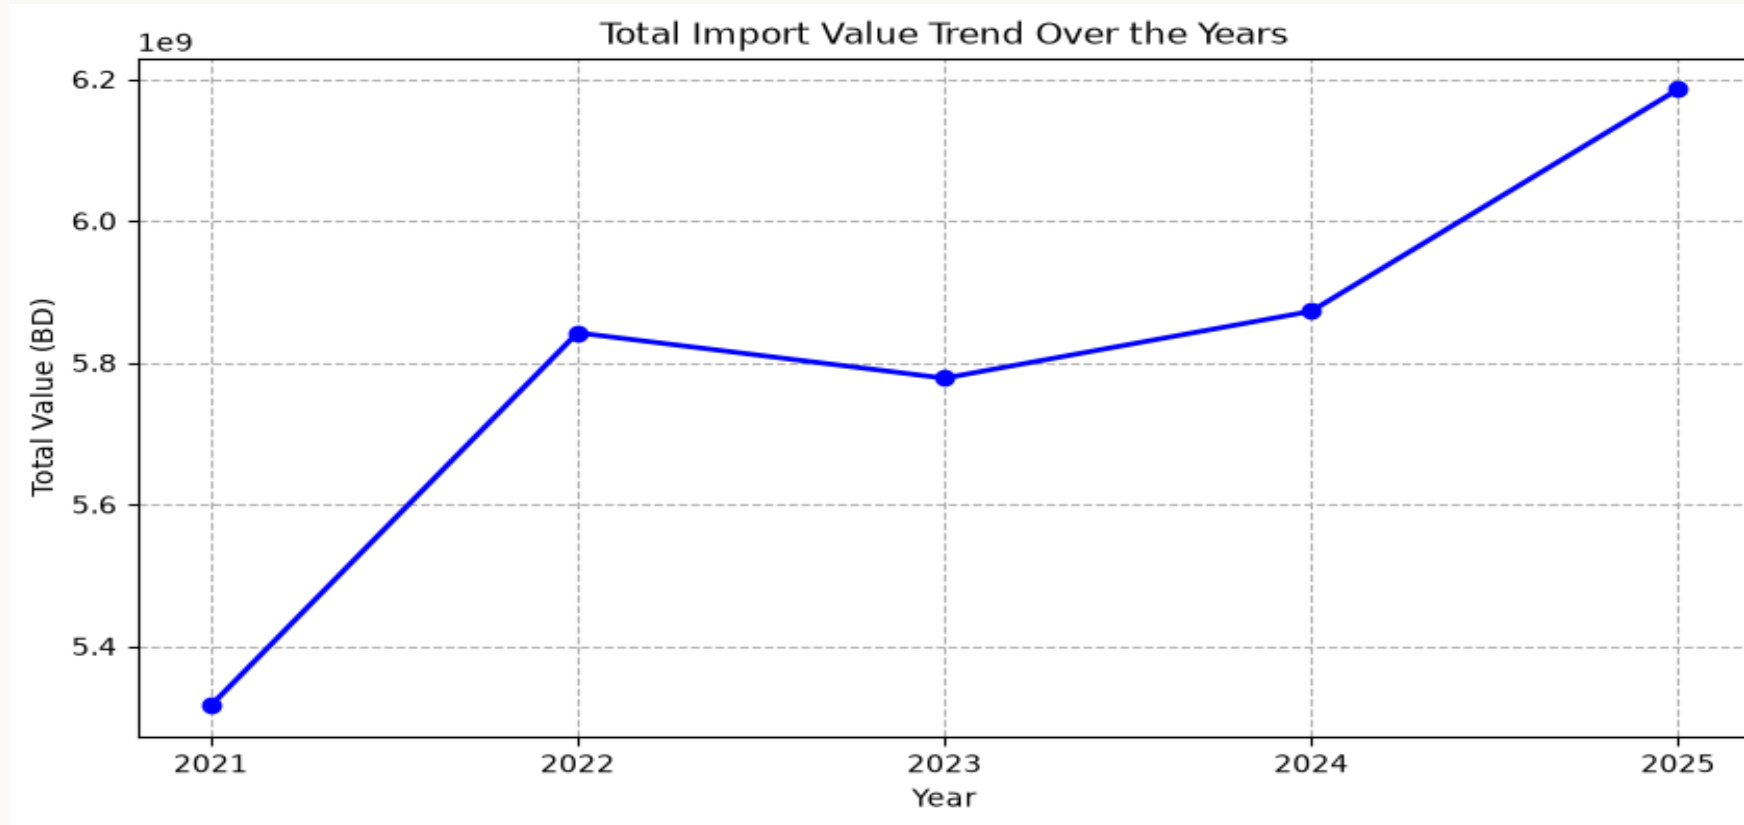

Chart shows each country's total import value (2021-2025) as a % of the top partner (China).

Key Insight: China is Bahrain's #1 import partner by value, with Brazil in second place. These two are the natural starting point for direct-import deals.

5. Deep Dive: Import Value Trends

Total import value in Bahraini Dinars (BD), by year.

Key Insight: Total import value grew steadily from 2021 to 2025 — with one small dip in 2023.

6. Summary of Findings

Top Partners

China and Brazil are Bahrain's biggest trading partners by total import value.

Growth Trend

Imports grew from 2021 to 2025, with only a small dip in 2023.

Cleaner Data

Data Cleaning: Unused columns and missing spaces were removed and fixed to make the data clean.

7. Recommendations & Next Steps

Make Direct Contracts

Buy directly from top partners like China and Brazil to skip middleman fees.

Fix Data Entry

Add system checks to stop negative import values from being entered again.

Plan for Growth

Use the rising import trend to plan logistics and warehouse space ahead of time.

Next step: Study which specific products are driving growth, and look into why 2023 dipped.
